

As questões de 1 a 6 referem-se ao texto a seguir:

GOODBYE THINGS, HELLO MINIMALISM: CAN LIVING WITH LESS MAKE YOU HAPPIER?

Fumio Sasaki owns a roll-up mattress, three shirts and four pairs of socks. After deciding to scorn possessions, he began feeling happier. He explains why.

1 Let me tell you a bit about myself. I'm 35 years old, male, single, never been married. I work as an
2 editor at a publishing company. I recently moved from the Nakameguro neighbourhood in Tokyo, where I
3 lived for a decade, to a neighbourhood called Fudomae in a different part of town. The rent is cheaper, but
4 the move pretty much wiped out my savings.

5 Some of you may think that I'm a loser: an unmarried adult with not much money. The old me would
6 have been way too embarrassed to admit all this. I was filled with useless pride. But I honestly don't care
7 about things like that any more. The reason is very simple: I'm perfectly happy just as I am. The reason? I got
8 rid of most of my material possessions.

9 Minimalism is a lifestyle in which you reduce your possessions to the least possible. Living with only
10 the bare essentials has not only provided superficial benefits such as the pleasure of a tidy room or the
11 simple ease of cleaning, it has also led to a more fundamental shift. It's given me a chance to think about
12 what it really means to be happy.

13 We think that the more we have, the happier we will be. We never know what tomorrow might bring, so
14 we collect and save as much as we can. This means we need a lot of money, so we gradually start judging
15 people by how much money they have. You convince yourself that you need to make a lot of money so you
16 don't miss out on success. And for you to make money, you need everyone else to spend their money. And
17 so it goes.

18 So I said goodbye to a lot of things, many of which I'd had for years. And yet now I live each day with a
19 happier spirit. I feel more content now than I ever did in the past.

20 I wasn't always a minimalist. I used to buy a lot of things, believing that all those possessions would
21 increase my self-worth and lead to a happier life. I loved collecting a lot of useless stuff, and I couldn't throw
22 anything away. I was a natural hoarder of knick-knacks that I thought made me an interesting person.

23 At the same time, though, I was always comparing myself with other people who had more or better
24 things, which often made me miserable. I couldn't focus on anything, and I was always wasting time. Alcohol
25 was my escape, and I didn't treat women fairly. I didn't try to change; I thought this was all just part of who I
26 was, and I deserved to be unhappy.

27 My apartment wasn't horribly messy; if my girlfriend was coming over for the weekend, I could do
28 enough tidying up to make it look presentable. On a usual day, however, there were books stacked
29 everywhere because there wasn't enough room on my bookshelves. Most I had thumbed through once or
30 twice, thinking that I would read them when I had the time.

31 The closet was crammed with what used to be my favourite clothes, most of which I'd only worn a few
32 times. The room was filled with all the things I'd taken up as hobbies and then gotten tired of. A guitar and
33 amplifier, covered with dust. Conversational English workbooks I'd planned to study once I had more free
34 time. Even a fabulous antique camera, which of course I had never once put a roll of film in.

35 It may sound as if I'm exaggerating when I say I started to become a new person. Someone said to
36 me: "All you did is throw things away," which is true. But by having fewer things around, I've started feeling
37 happier each day. I'm slowly beginning to understand what happiness is.

38 If you are anything like I used to be – miserable, constantly comparing yourself with others, or just
39 believing your life sucks – I think you should try saying goodbye to some of your things. [...] Everyone wants
40 to be happy. But trying to buy happiness only makes us happy for a little while.

Questão 1. De acordo com o texto, Fumio

- A () já foi casado, mas está solteiro no momento.
- B () morou em Nakameguro por 10 anos.
- C () mudou-se de Tóquio recentemente.
- D () é editor em uma agência de publicidade.
- E () mudou-se porque precisava quitar dívidas.

Questão 2. Antes da mudança, Fumio acumulava bens materiais porque

- A () queria vendê-los quando chegasse à velhice.
- B () costumava julgar as pessoas pelos carros que possuíam.
- C () queria desfrutar deles sem se preocupar com o futuro.
- D () acreditava que as posses aumentariam a sua autoestima e felicidade.
- E () desejava impressionar a mulher que amava por meio de suas posses.

Questão 3. Sobre Fumio, é correto afirmar que

- A () a mudança para o novo apartamento fez com que suas reservas financeiras aumentassem.
- B () seu antigo apartamento era tão bagunçado que ele não podia sequer receber a namorada.
- C () desperdiçava tempo e não conseguia manter o foco, antes de aderir ao minimalismo.
- D () orgulhava-se de ter um salário mais alto do que todos os seus amigos.
- E () era alcoólatra e violento com as pessoas, antes de mudar o estilo de vida.

Questão 4. Todas as frases abaixo usam a forma comparativa do adjetivo, **EXCETO**:

- A () The rent is cheaper, (linha 3)
- B () ...you reduce your possessions to the least possible. (linha 9)
- C () ...the more we have, the happier we will be. (linha 13)
- D () I feel more content now than I ever did in the past. (linha 19)
- E () But by having fewer things around, (linha 36)

Questão 5. As palavras sublinhadas nos excertos da coluna I foram utilizadas tendo os referentes respectivamente indicados na coluna II.

Coluna I

- I. ...it has also led to a more fundamental shift. (linha 11)
- II. ...which often made me miserable. (linha 24)
- III. ...I would read them when I had the time. (linha 30)
- IV. ...which of course I had never once ... (linha 34)

Coluna II

- living with only the bare essentials
- other people who had more or better things
- my bookshelves
- a fabulous antique camera

Estão corretas

- A () I, II e III. B () I e III. C () I e IV. D () II, III e IV. E () todas.

Questão 6. Marque a opção correta de acordo com o sentido com que os verbos modais sublinhados são empregados no texto.

- I. Can living with less make you happier? (título) → para indicar uma possibilidade.
- II. We never know what tomorrow might bring, (linha 13) → para indicar um estado contrário à realidade.
- III. It may sound as if I'm exaggerating... (linha 35) → para indicar uma probabilidade.
- IV. I think you should try saying goodbye to some of your things. (linha 39) → para dar um conselho.

Estão corretas

- A () I e II. B () I, II e IV. C () I, III e IV.
D () II, III e IV. E () II e IV.

As questões de 7 a 12 referem-se ao texto a seguir:

WE RECORDED VCS CONVERSATIONS AND ANALYZED HOW DIFFERENTLY THEY TALK ABOUT FEMALE ENTREPRENEURS

1 When venture capitalists (VCs) evaluate investment proposals, the language they use to describe the
2 entrepreneurs who write them plays an important but often hidden role in shaping who is awarded funding
3 and why.[...] We were given access to government venture capital decision making meetings in Sweden and
4 were able to observe the types of language that VCs used over a two-year period. One major thing stuck out:
5 The language used to describe male and female entrepreneurs was radically different. And these differences
6 have very real consequences for those seeking funding — and for society in general.

7 [...] Worldwide, government venture capital is important for bridging significant financial gaps and
8 supporting innovation and growth, as VCs can take risks where banks are not allowed to. When uncertainty is
9 high regarding assessment of product and market potential, for example, the assessment of the
10 entrepreneur's potential becomes highly central in government VCs' decision making.

11 In Sweden, about one-third of businesses are owned and run by women, although they are not granted
12 a corresponding proportion of government funding. In fact, women-owned businesses receive much less —
13 only 13%–18%, the rest going to male-owned companies.

14 This brings us back to our research. From 2009 to 2010 we were invited to silently observe
15 governmental VC decision-making meetings and, more important, the conversations they had about
16 entrepreneurs applying for funding. [...] We observed closed-room, face-to-face discussions leading final
17 funding decisions for 125 venture applications. Of these, 99 (79%) were from male entrepreneurs and 26
18 (21%) were from female entrepreneurs. The group of government venture capitalists observed included
19 seven individuals: two women and five men. [...]

20 Aside from a few exceptions, the financiers rhetorically produce stereotypical images of women as
21 having qualities opposite to those considered important to being an entrepreneur, with VCs questioning their
22 credibility, trustworthiness, experience, and knowledge.

23 Conversely, when assessing male entrepreneurs, financiers leaned on stereotypical beliefs about men
24 that reinforced their entrepreneurial potential. Male entrepreneurs were commonly described as being
25 assertive, innovative, competent, experienced, knowledgeable, and having established networks.

26 We developed male and female entrepreneur personas based on our findings [...]. These personas
27 highlight a few key differences in how the entrepreneurs were perceived depending on their gender. Men
28 were characterized as having entrepreneurial potential, while the entrepreneurial potential for women was
29 diminished. Many of the young men and women were described as being young, though youth for men was
30 viewed as promising, while young women were considered inexperienced. Men were praised for being
31 viewed as aggressive or arrogant, while women's experience and excitement were tempered by discussions
32 of their emotional shortcomings. Similarly, cautiousness was viewed very differently depending on the gender
33 of the entrepreneur.

34 Unsurprisingly, these stereotypes seem to have played a role in who got funding and who didn't.
35 Women entrepreneurs were only awarded, on average, 25% of the applied-for amount, whereas men
36 received, on average, 52% of what they asked for. Women were also denied financing to a greater extent
37 than men, with close to 53% of women having their applications dismissed, compared with 38% of men. [...]

38 Such stereotyping will inevitably influence the distribution of financing, but could also have other major
39 consequences. Because the purpose of government venture capital is to use tax money to stimulate growth
40 and value creation for society as a whole, gender bias presents the risk that the money isn't being invested in
41 businesses that have the highest potential. This isn't only damaging for women entrepreneurs; it's potentially
42 damaging for society as a whole.

Fonte: Adaptado de *Harvard Business Review* <<https://hbr.org/2017/05/we-recorded-vcs-conversations-and-analyzed-how-differently-they-talk-about-female-entrepreneurs>>. Acesso em: 17 mai. 2017.

Questão 7. De acordo com o texto, é correto afirmar que

- A () o número de propostas feitas por mulheres representava um terço do total de pedidos de investimento.
- B () em virtude dos estereótipos de gênero, somente 16 das candidatas receberam financiamento.
- C () as empreendedoras que foram aprovadas receberam somente 53% do total que requereram.
- D () os homens conseguiram mais do que o dobro de financiamento se comparados às mulheres.
- E () 52% dos requerentes do gênero masculino tiveram seus pedidos de financiamento aprovados.

Questão 8. De acordo com o texto, é correto afirmar que

- A () na Suécia, as mulheres possuem cerca de um terço das empresas e, proporcionalmente, conseguem financiamento correspondente ao concedido a empreendedores do sexo masculino.
- B () foram observadas, pelo período de um ano, as reuniões decisórias para a escolha de quais empreendedores receberiam investimento de capital de risco pelo governo sueco.
- C () a análise do potencial de mercado ou do produto é primordial na tomada de decisão sempre que há dúvidas em relação ao potencial do empreendedor.
- D () tendo em vista que os bancos não podem assumir determinados riscos, o aporte de capital por parte do governo desempenha um papel importante no incentivo à inovação e ao crescimento.
- E () a forma como os investidores (VCs) descrevem os empreendedores desempenha um papel muito claro e inquestionável na decisão de como os recursos financeiros são distribuídos.

Questão 9. De acordo com as observações dos pesquisadores, para os investidores (VCs)

- A () excesso de entusiasmo causa desconfiança em relação a controle emocional, no caso de mulheres.
- B () cautela é positiva quando se trata de homens; porém, no caso de mulheres, significa medo de arriscar.
- C () juventude é vista como um aspecto promissor tanto para mulheres quanto para homens.
- D () agressividade e arrogância são consideradas características negativas para ambos os gêneros.
- E () experiência, conhecimento e competência são características marcantes das mulheres.

Questão 10. Marque a opção que lista qualidades expostas no texto que foram colocadas em dúvida em relação às empreendedoras.

- A () Experiência, cautela, juventude e liderança.
- B () Potencial para inovação, competência, assertividade e entusiasmo.
- C () Entusiasmo, potencial de crescimento, confiabilidade e competitividade.
- D () Assertividade, conhecimento de mercado, competência e determinação.
- E () Conhecimento, credibilidade, experiência e confiabilidade.

Questão 11. A expressão sublinhada na primeira coluna pode ser substituída pela expressão na segunda coluna em todas as opções, **EXCETO** em

- A () Although they are not granted... (linha 11) → even though
- B () Aside from a few exceptions, (linha 20) → apart from
- C () Conversely, when assessing male entrepreneurs, (linha 23) → likewise
- D () Whereas men received, on average, (linhas 35/36) → while
- E () Because the purpose of government venture capital is... (linha 39) → considering that

Questão 12. Na sentença "Men were characterized as having entrepreneurial potential, **while** the entrepreneurial potential for women was diminished", indique a expressão que pode substituir **while** mantendo o significado e a correção gramatical.

- A () yet
- B () so long as
- C () despite
- D () but that
- E () since

As questões de 13 a 15 referem-se à tirinha a seguir:

Fonte: <<http://www.cartoonistgroup.com/subject/The-Snert-Comics-and-Cartoons-by-Hagar+The+Horrible.php>>. Acesso em: 23 mai. 2017.

Questão 13. A mãe de Helga pergunta "What did you ever see in that man?" porque

- A () acha que ele não dá atenção a sua filha.
- B () repara que ele trata Helga de forma rude.
- C () percebe que Helga está chateada com ele.
- D () suspeita que ele trate o cão melhor do que Helga.
- E () observa que ele é um homem folgado.

Questão 14. O fato de Helga usar a expressão "Oh... now, mother...", significa que ela

- A () concorda com sua mãe que cometeu um erro ao se casar com Hägar.
- B () vai contar à sua mãe porque se casou com Hägar.
- C () está irritada com o comportamento do marido.
- D () ficou incomodada com o comentário de sua mãe.
- E () quer confessar para sua mãe o desânimo com o casamento.

Questão 15. A ironia da mãe de Helga, ao afirmar: "I can see that!", reside no fato de que

- A () ela vê quão bem Hägar trata Snert.
- B () ela constata que Hägar trata Snert como se fosse um serviçal.
- C () Snert pode comer junto com a família.
- D () Hägar passou a noite inteira ensinando truques para Snert.
- E () Hägar permite que Snert fique dentro da casa.

As questões de 16 a 20 referem-se ao texto a seguir:

AUGMENTATION OF BRAIN FUNCTION: FACTS, FICTION AND CONTROVERSY

1 Augmentation of brain function is no longer just a theme of science fiction. _____(I) advances in
2 neural sciences, it has become a matter of reality that a person may consider at some point in life, for example
3 as a treatment of a neurodegenerative disease. Currently, several approaches offer enhancements for sensory,
4 motor and cognitive brain functions, _____(II) for mood and emotions. Such enhancements may be
5 achieved pharmacologically, using brain implants for recordings, stimulation and drug delivery, _____(III)
6 employing brain-machine interfaces, or even by ablation of certain brain areas.

7 In this Research Topic, we welcome papers critically evaluating the existing methods of brain
8 augmentation, introducing new approaches and probing particular parts of brain circuitry and particular
9 neuronal mechanisms as candidates for an enhancement. We welcome scientists from different fields: from
10 neuroscience of microcircuits to systems neuroscience of large-scale networks and neural engineering. The
11 work can be experimental or computational. Reviews and papers on philosophical and ethical issues are
12 _____(IV) welcome.

13 While the scope of possible relevant topics is broad, the authors are encouraged to clearly indicate how
14 their studies address the announced theme of brain augmentation.

15
16 **Important Note:** All contributions to this Research Topic must be within the scope of the section and
17 journal to which they are submitted, as defined in their mission statements. Frontiers reserves the right to guide
18 an out-of-scope manuscript to a more suitable section or journal at any stage of peer review.

15 jul. 2017.

Questão 16. Marque a opção que preenche, correta e respectivamente, as lacunas I, II, III e IV inseridas no texto.

- A () Due to, as well as, by, also
- B () Because, and, through, too
- C () Owing to, including, beyond, moreover
- D () In view of, plus, over, additionally
- E () Thanks to, together with, by way, likewise

Questão 17. O texto é um(a):

- A () artigo de opinião.
- B () artigo científico.
- C () resumo de projeto de pesquisa.
- D () relato de experiência.
- E () chamada para publicação.

Questão 18. Considere as seguintes afirmações:

- I. A melhoria ou o aumento das funções cerebrais pode ser obtida via: estimulação farmacológica, interface cérebro-máquina, implantes cerebrais ou mesmo remoção de determinadas áreas do cérebro.
- II. Atualmente, abordagens para melhoria das funções cerebrais envolvem exclusivamente funções sensoriais, cognitivas e motoras.
- III. O aumento das funções cerebrais pode vir a ser usado no tratamento de doenças neurodegenerativas.

Com base no texto, estão corretas

- A () apenas I e II.
- B () apenas I e III.
- C () apenas II e III.
- D () apenas III.
- E () todas.

Questão 19. Com base no texto, é **INCORRETO** afirmar que estudos sobre a melhoria das funções cerebrais

- A () devem-se aos avanços que foram conquistados no campo das Neurociências.
- B () são realizados tanto na esfera computacional quanto no domínio experimental.
- C () são realizados por cientistas de diferentes áreas.
- D () ainda estão apenas no campo da ficção científica.
- E () englobam questões de natureza ética e filosófica.

Questão 20. Marque a opção que indica a que **it** se refere no seguinte excerto: "...**it** has become a matter of reality..." (linha 2).

- | | |
|--------------------------------------|--|
| A () advances in neural sciences | B () treatment of a neurodegenerative disease |
| C () some point in life | D () science fiction |
| E () augmentation of brain function | |
